# Notes:

1. The basis for the data in the table is defined by AXPC. The GHG data reported is for U.S. operated assets reporting under Subpart W and other metrics corresponding to U.S. operations. ↩
2. Safety-related data for 2021 and 2022 has been restated to reflect all U.S. operated assets. Rates for 2021 and 2022 are shown including COVID-19 work-related illnesses experienced in 2021 and 2022 as defined by OSHA. ↩
3. Data does not include heritage Marathon Oil assets unless otherwise noted. ↩
4. In 2024 safety metrics include incidents but does not include work hours for heritage Marathon Oil Corporation from November 22 to December 2024. ↩
5. The increase is due to asset acquisitions and increased activities in Lower 48. ↩
6. Please refer to our Flaring definitions and volumes as reported in Performance Metrics by Year. ↩
7. Please refer to our Hydrocarbon Spills related data as reported in Performance Metrics by Year. ConocoPhillips follows the Ipieca-API-IOGP Sustainability reporting guidance for the oil and gas industry. This scope of this guidance pertains to hydrocarbon spills over 1 bbl and that is what is reported in our performance metrics tables. We do not report on other liquid spill media. ↩
8. BOE expressed as BOE EUR for unconventional assets. ↩
9. Employee workhours based on headcount reports from HR. Contractor hours based on factors applied to spend (by activity type). ↩
